

MRS-9000

Mid Range Stacker 2 Axis Servo Lehr Loader

Stability Precision Control

Technical Specification

Model
MRS-9000

Overall weight
750kg

Operating speed range
Up to 12 cycles per minute

Controller type
Servo drives with integrated motion control

Features and Benefits

- On Line Advance - Retard
- Pushbar Deceleration Control
- Adjustable Lift Height
- Adjustable Push Height
- Built In Panel Cooling System
- Dual linear bearings for wear-free linear movement
- 2 identical brushless AC Servomotors
- Minimum moving parts
- Self contained unit only pulse and 3ph supply required
- Low running costs
- 2 axis Servo control
- Compact low profile design allowing for minimal heat ingress
- Simple user friendly LCD text based interface
- Minimal spare parts package required
- Auto synchronism with production line
- Proven reliable components
- Value engineered to give rapid return on capital invested
